VIVEK JADHAV

Sangli, Maharashtra, India | vivekjadhav1068@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer(Data Science) graduate with hands-on experience in AI/ML, full-stack web development, and cloud-deployed applications. Proficient in Python, TensorFlow, React.js, Node.js, PostgreSQL, and Docker. Builds end-to-end solutions spanning conversational AI, predictive analytics, REST APIs, and AR applications. Eager to contribute to production-grade software in a fast-paced engineering team.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, SQL, HTML5, CSS3

AI / ML: TensorFlow, Scikit-learn, NLP, Deep Learning, Pandas, NumPy

Frontend: React.js, Redux, Bootstrap, Responsive Web Design

Backend: Node.js, Flask, FastAPI, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Cloud & DevOps: IBM Cloud, Docker, GitHub Actions

PROJECTS

AI Chatbot — Conversational NLP Engine — *Python · TensorFlow · NLP · Flask · REST API · Docker*

- Trained intent-classification neural network using TF-IDF vectorization and Keras dense layers, achieving ~85% accuracy on domain-specific queries.
- Exposed inference via Flask REST API; automated retraining pipeline reduced classification error rate by ~20% across iterations.
- Containerised service with Docker for reproducible IBM Cloud deployment; integrated chatbot into a React web front-end via JSON endpoints.

Full-Stack Web App — IBM Cloud Deployment — *React.js · Node.js · PostgreSQL · Docker · IBM Cloud · CI/CD*

- Built full-stack application with React.js frontend and Node.js/Express backend connected to a normalised PostgreSQL schema (10+ relational entities).
- Deployed on IBM Cloud via Docker containers with CI/CD pipeline; achieved 99.5% uptime and reduced release cycle by 40%.
- Implemented JWT authentication, role-based access control, and RESTful API design following OpenAPI conventions.

Predictive Analytics ML Pipeline — *Python · Scikit-learn · XGBoost · PostgreSQL · Pandas · Matplotlib*

- Engineered ETL pipeline — raw data into PostgreSQL, Pandas preprocessing, feature engineering — then trained Random Forest, XGBoost, and Logistic Regression models.
- Best model achieved F1 = 0.89 and AUC-ROC = 0.93; applied GridSearchCV tuning and SHAP feature-importance analysis for explainability.

Augmented Reality Navigation App — *ARCore · Unity3D · C# · Android · Computer Vision*

- Built Android AR app with Google ARCore plane detection and Unity3D rendering; overlaid real-time navigation cues with sub-5 cm positional accuracy.
- Reduced indoor navigation time by ~30% in user tests versus traditional 2-D floor maps.

EDUCATION

Bachelor of Technology — Computer Science (Data science) 2024 – 2027

University, Kolhapur, Maharashtra | Coursework: Machine Learning · DBMS · Cloud Computing · Computer Vision · Data Structures

Diploma -- Computer Technology 2021 – 2024

MSBTE,AITRC Vita, Maharashtra

CERTIFICATIONS & ACHIEVEMENTS

- IBM Full Stack Software Developer Professional Certificate — Coursera / IBM
- Machine Learning with Python — IBM / Coursera
- Introduction to Data Science — IBM / Coursera
- Docker & Containerisation Fundamentals — Udemy
- Active GitHub contributor: 13+ repositories spanning AI, full-stack, and AR domains; recognised as Data Scientist on profile.
